

# AHTNA

## Radiation Monitoring, Detection and Response Systems

### *Worldwide*

*U.S. Department of Energy/National Nuclear Security Administration*

### ***Project Description***

Ahtna is selected as part of a crucial mission of the U.S. Department of Energy/National Nuclear Security Administration Second Line of Defense (SLD) Program, in cooperation with foreign governments and other U.S. agencies such as the Department of State, Department of Commerce, and Customs Service. Ahtna provides design, construction, integration, and installation of integrated and sustainable radiation monitoring, detection, and response systems at international airports and transshipment hubs around the world. The SLD Program's objective is to enhance international nuclear non-proliferation and to reduce global danger from weapons of mass destruction. Under this contract, Ahtna has worked in more than 25 countries in the former Soviet Union, Europe, Asia, and the Americas.

***Port of Balboa, Panama.*** Ahtna-installed vehicle Radiation Portal Monitors and Optical Character Recognition cameras.

***Shirvanovka, Azerbaijan.*** Radiation Portal Monitor placement.
